CyberSafely
Parental Safety Solution

Bring Something Real to Your School — And Get Paid for It

A pilot your principal will say yes to, and a reason for you to be the one who brought it.

Every year, teachers see the same fundraisers ask more from families for less in return. CyberSafely.ai is different — it gives families a real tool to help keep their kids safer online, funds your school at the same time, and puts something in your pocket for being the one who introduced it.

What CyberSafely.ai Is

CyberSafely.ai is an AI-powered parental safety platform built around a smart keyboard that detects real-time risks such as cyberbullying, sextortion, drug references, and self-harm language, across every app a child uses. When something matters, parents get an instant alert with the context to act, without retaining a record of their child's day.

AI-Powered Monitoring	Instant Parent Alerts	Always-On Coverage
A smart keyboard replaces the standard one and checks typed content in real time for risk signals. Passwords are never collected.	Notifications within seconds, with a severity rating and the context to respond. Parents choose their own detail level.	Works across every app and platform, surfacing risks early, before online danger becomes real-world harm.

Why Your Principal Will Want to Hear This

- Replaces low-return traditional fundraisers — one recent example brought in about $2,200 for a full season of work
- 20% goes straight to the school automatically, every year a family stays enrolled
- No new liability for the school — parents make the decision to subscribe, and parents monitor their own children

What's In It For You

As the teacher who brings this to your school, you earn 5% of everything your classroom or school generates — for as long as those families stay enrolled.

How the Money Splits

Role	Share
School	20%
Principal	2%
Agent / Referral	2%
You (Teacher)	**5%**

Agent/Referral is whoever introduced you to CyberSafely.ai.

If You Pilot With Your Classroom

25 students, at four participation levels:

Participation	Paying Families	Total Raised	School Gets	Principal Gets	Agent Gets	You Get
25%	6	$900	$180	$18	$18	**$45**
50%	**13**	**$1,950**	**$390**	**$39**	**$39**	**$98**
75%	19	$2,850	$570	$57	$57	**$143**
100%	25	$3,750	$750	$75	$75	**$188**

If It Goes School-Wide

2,500 students, at four participation levels:

Participation	Paying Families	Total Raised	School Gets	Principal Gets	Agent Gets	You Get
25%	625	$93,750	$18,750	$1,875	$1,875	**$4,688**
50%	**1,250**	**$187,500**	**$37,500**	**$3,750**	**$3,750**	**$9,375**
75%	1,875	$281,250	$56,250	$5,625	$5,625	**$14,063**
100%	2,500	$375,000	$75,000	$7,500	$7,500	**$18,750**

These are estimates, not promises — built from the program's math, not a guarantee of participation.

Bring in a Colleague, Compound Your Earnings

Your earning potential isn't limited to your own classroom. If you introduce another teacher to CyberSafely.ai, you become their Agent — earning 2% on their pilot, on top of your own 5%.

Example, both at 50% participation:

	Your Classroom (Teacher, 5%)	+ Colleague's Classroom (Agent, 2%)	Your Total
Classroom scale	$98	$39	**$137**
School-wide scale	$9,375	$3,750	**$13,125**

Bring in more colleagues, and each one can add another 2% stream on top of your own 5%.

Next Step

Talk to your principal about piloting this in your classroom, or school-wide.
